DETAILED ACTION

Drawings

1. The amendment filed on 11 October 2007 has overcome the previous drawing objection and therefore it is thereby withdrawn.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1 – 13 and 15 are rejected under 35 U.S.C. § 101 because the improperly embrace both product or machine and process. The language of 35 U.S.C. § 101 sets forth statutory classes of invention in alternative only. See Ex parte Lyell, 17 USPQ2d 1549.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 – 13 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claims 1 – 13 and 15 are ambiguously constructed and indeterminate in scope because they purport to claim both an apparatus and method of using or practicing the apparatus in a single claim. The subject matter of claim 1 includes both product and process of making. Lines 1 - 12 are drawn to a rock bolt as illustrated in Figures 1 and 2. Lines 12 – 18 are drawn to a method of making the apparatus as illustrated in Figures 3 – 6. Furthermore, it would be

impossible to construct the apparatus of Figures 1 and 2 using the method of Figures 3 - 6.

Claims 2 – 13 and 15 are rejected as being dependent upon claim 1. Several dependent claims only refer to part of the invention as recited in claim 1. For example, claim 9 states that the anchor member is nitrided to prevent sticking between the anchor member and the shaft. Claim 9 is only relevant to the part of claim 1 that applies to Figures 1 and 2. There is no need to nitride the anchor member of Figures 3 - 6 to prevent sticking as the anchor of Figures 3 - 6 do not slide along the shaft.

Response to Arguments

7. Applicant's arguments with respect to claims 1 - 13 and 15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
